## Search Tips, Hints and Suggestions

While basic and advanced searching is easy and intuitive, there are several tips that will assist you in getting the best results possible.

- When searching under company name, be as simple as possible. For example enter Engineer instead of Engineering.
- The executive name listed in the Results will be the highest-ranking executive for that business.
- You do not need to select data elements in order to view them on detailed records. All available data elements will be in the detail on the business profile.
- Use the summary button to view results based on key elements such as employee size or sales volume and by a number of geographic selects.
- When performing a Customer Search by business type you can use a keyword, SIC or NAICS.
  - Keyword search will return closest and related matches based on your keyword.
  - Click on the matches you want to add to your search. Those selections will populate the lower box.
- For the city/state search filter for a city OR a state then select for the correct city or state.
- There are search tips embedded throughout the site to assist you in creating searches and to give you further detail on data elements.
